Course Description An examination of Strategic Management and Planning in relation to Health and Human Services Organizations. The role of the director in planning and managing the organization and in collaborative and community wide planning efforts. The impact of planning on resource allocation, personnel, and decision making, in Health and Human Service Organizations.

Goals and Objectives of the Course:

The goals of this course include the following: 1) to provide the student with an overview and understanding of the basic management issues relating to planning; 2) identify best management practices; 3) identify the issues in the field impacting on organizational decision making, including collaborative and community wide planning.

Objectives: Upon completion of this course the student will be able to:

1. Demonstrate a basic understanding of the principles of planning and their impact on organizational change and program change.
2. Identify the basic components of planning and demonstrate competence in carrying out a strategic analysis of an organization.
3. Understand the importance of resource development in relation to planning and establishing organizational priorities.
4. Demonstrate a basic understanding of leadership principles, team building, and problem solving.
5. Understand the process of establishing organizational priorities in relation to fiscal planning and linking planning priorities to resource capability.
CLASS ATTENDANCE AND PARTICIPATION: Students are expected to attend class and participate in activities and discussions. Regular class attendance will be viewed as part of the student’s grade. There will be four writing assignments, Mission/Vision analysis, SWOT analysis, an agency service plan, and one major writing assignment of developing a Strategic Plan for an organization. Students will also be responsible for one in class presentation on a topic they choose the second week of class.
