Course Description: This course is a four credit course designed to introduce the student to the basic principles, techniques and the logic of data analysis. It also will familiarize the student with statistical reasoning. This course focuses on core statistical concepts and techniques that are used in many fields.

Course Objective: This course focuses on knowledge and skill development in the statistical area. The objective of the course is to prepare the student to become a producer of empirical analyses in the future.

Course Requirements: Students are expected to attend all class periods, turn in homework assignments when due, complete all learning enhancers and the midterm and final. The student will also do a project. Student success is enhanced by keeping up to date with required readings. Class attendance is also critical to the student being successful. In order to encourage the student to look through the material before class the attendance will be taken throughout the semester by means of a brief quiz on the reading material. Students are also strongly encouraged to print out copies of the instructor's PowerPoint presentations. These are accessible in .pdf format (3 up with lines for taking notes). They can be accessed from the "n" drive when using a Levin College computer. The student can also access them from home via the internet by typing ftp://urban.csuohio.edu from non-Levin computers as your explorer address. Once to the site, choose "utility" and then "weizer" and then "ust404statistics." Copies of the syllabus and the project will also be accessible there.

Grading Policy: Grades are based on the results of homework, learning enhancers, project, tests and class participation. Homework questions are noted on the syllabus with due dates. A penalty of 5% per week will be assessed on homework that is turned in late. Please note final submission dates for homework. The instructor will not accept homework after final submission dates. The four learning enhancers will be given as noted in the syllabus. There will also be two tests given (a midterm and the final). The grade will consist of the following:

- Attendance: 10%
- Group Assignments: 10%
- Homework: 15%
- Project: 10%
- 4 learning enhancers: 5% each
- Midterm: 15%
- Final: 20%
Grading scale:  95-100 A  94-90 A-  89-87 B+  86-83 B  82-80 B-  79-75 C+
